

Career Opportunity

Position: Project Manager HVAC Division – Middle East

Location: Middle East

Reporting to: Group General Manager

We have an opportunity for a Divisional HVAC Manager, working in the Middle Eastern Acoustic, Air Distribution Manufacturing and Projects industries. The role will involve managing large world-class projects in various countries in the Middle East and reporting directly to the Group General Manager.

This position is based in the Middle East and will suit a highly motivated individual, keen to develop his career and has enthusiasm to make a significant contribution towards the success of the business. The ideal candidate should have the following qualifications:

- Engineering (Mechanical Electrical or Building Services) degree or equivalent
- Considerable experience in the construction, engineering or building services sectors
- A proven track record in successfully managing projects and activities
- Excellent IT and interpersonal communication skills
- Middle East working experience would be an advantage
- A proven profit and loss management record
- Ability to work independently, take initiative and have self-motivation skills
- Be a skilled negotiator and solution provider with industry specifiers, end users, engineers and contractors
- Be willing to travel extensively throughout the Middle East
